

# CHECKLIST

- Indicate interest in PSA on the Applicant Information System (AIS) on or before May 1 by selecting the system institution(s) to which Texas A&M should send your application information. The priority deadline to accept your PSA offer is March 15.
- Select a participating major from the list on AIS.
- Check Texas Success Initiative (TSI) requirements and math readiness at the system institution(s) selected.
- After being admitted to a specific system institution, attend that school's new student orientation (if required).
- Apply for scholarships/financial aid at the system institution (redirect FAFSA to system institution).
- Contact the system institution to determine if developmental or pre-requisite math courses should be taken prior to the fall to stay on track with the degree plan. (Most degree plans require calculus-level math courses.)
- Register for major-specific courses as outlined on the PSA degree plan.

## WHAT IS PSA?

The Program for System Admission (PSA) is an alternative admission program for selected students not offered freshman admission to Texas A&M University. PSA provides students the opportunity to attend a Texas A&M University system institution with the goal of enrolling at Texas A&M in College Station after one year.

[admissions.tamu.edu/PSA](http://admissions.tamu.edu/PSA)

## PROGRAM GUIDELINES

- Freshman applicants to Texas A&M are pre-qualified for admission to the system institutions based on requirements provided by each school.
- PSA is a one-year program that guarantees admission to Texas A&M to students who successfully complete all program requirements as defined on the PSA web page.
- Applicants must choose a major from the list of those participating (not all majors participate). Visit the PSA web page for a complete list.
- Applicants must attend the fall and spring semester (after high school graduation) at the system institution.
- Applicants must complete at least 24 hours during the fall and spring semesters at the system institution and maintain a 3.0 cumulative GPA at that school AND maintain a minimum 3.0 GPA on all transferable coursework (including dual credit).  
**Note:** Engineering applicants must maintain a 3.5 cumulative GPA at that school AND a minimum 3.0 GPA on all other transferable coursework (including dual credit) to guarantee admission.

### PLEASE NOTE

Most PSA degree plans require calculus-level math. Prerequisite math courses may be required prior to fall enrollment at the system institution.

Students admitted to Texas A&M through PSA will be required to follow the curriculum for the major to which they are admitted. Change of major requests are not guaranteed.
