#### **Career & Educational Opportunities**

The Health Humanities is a growing, cross-disciplinary field that practices the analysis of health and illness within cultural activities and products. Students of the Health Humanities may use methods of analysis drawn from history, literature, philosophy, bioethics, and comparative religion, as well as social sciences (i.e., sociology, anthropology, and psychology) in order to better understand the lived experience of health and illness. Health Humanities serves to question the 'two cultures' thesis that postulates the sciences and humanities are separate, arguing instead that our experience of health and illness is never only biological or 'cultural,' but always both. Grounding in this interdisciplinary field prepares undergraduates with skills and knowledge relevant to careers in healthcare or graduate school in humanities or social sciences.
