- College Algebra, Trigonometry, and Pre-Calculus are transferable courses but **will not** satisfy the Mathematics requirements in this degree plan.
- \*Prospective students attending an institution without an equivalent to CHEM 107/117 can transfer an equivalent to Fundamentals of Chemistry II (CHEM 120 – CHEM 1412) to fulfill the CHEM 107/117 requirement.

The recommendations below represent what a TAMU student's schedule may look like during the first four semesters minus the TAMU College of Engineering courses. If working to complete an Associate's Degree before transferring, work with your current academic advisor to try and align your degree plan with TAMU degree requirements to the extent possible.

**Coursework Timeline**

- Competitive applicants will have the required coursework completed and the additional coursework in progress or completed by the application deadline.
- Applicants to the summer/fall term **may be** asked to submit spring final grades, this is not a guarantee.
- Summer coursework **will not** be considered for summer/fall applicants.
- Fall coursework **will not** be considered for spring applicants.
- Applicants to the spring term should have the Required coursework completed by the end of Summer II semester before applying.

**Additional Transfer Requirements**

- The Department of Computer Science and Engineering is looking for students who are interested in pursuing our degrees as a focus. Students should indicate one of our department's majors as the primary major they are interested in if they wish to be admitted.
- The essay and supporting materials should reflect that the student is interested in pursuing our degree. A carefully formulated essay can have a positive effect if the applicant has unusual circumstances.
- Meeting minimum requirements **does not** guarantee admission. The entire record is reviewed for consistency in coursework and grades. Application decisions are subject to department capacity limits.

**Additional Information**

- Applicants are advised to keep copies of the syllabi for the specific section of classes to be transferred in case they are needed to document equivalence to Texas A&M University classes.
- Applicants should be serious about earning a degree in Computer Science.
- Transfer applicants are instructed **NOT** to accept transfer admission to any major with the expectation of later applying for an on-campus change of major.
- Applicants with prior computer science coursework, including a programming course in a language such as C, C++, or Java will be better prepared for our curriculum.

**Career & Educational Opportunities**

Computer science is a broad discipline that deals with the analysis, design and synthesis of computer systems and their applications. Computer scientists develop the programs that run computers, from the small ones on your kitchen countertop to the large ones on Space Shuttles and Mars Rovers. They help design robots that can assist in search and rescue operations in times of disaster. Computer scientists create the algorithms that drive Artificial Intelligence. They create the motion planning software that can replicate protein misfolding so that we can better understand diseases such as Alzheimer's. They look for ways to make human-computer interaction more natural and efficient by developing technologies such as sketch recognition. Computer scientists analyze web data in order to make the Internet and other networks safer and more efficient. Overall, they solve complex problems in order to make the world a better place.
