Career & Educational Opportunities

Biomedical Sciences is a broad field of applied biology that is directed toward understanding health and disease. The program both emphasizes versatility in the biological and medical sciences and prioritizes a One Health approach to education through courses that emphasize the interconnectedness of animal, human, and environmental health, while bringing together students with interest in medical careers that impact all three. A highly effective counseling program assists students with the development of an individualized approach and course package that orients and prepares the students for entry into the medical, allied health field, or graduate program of their choice. Such an approach enhances their educational experiences, improves their placement in professional and graduate programs, and facilitates their entry into the biomedical science job market.
