Coursework Timeline

- Competitive applicants will have the required coursework completed by the application deadline.
 - Applicants to the fall term **may be** asked to submit spring final grades before their applications are evaluated; holding applications for final spring grades is not a guarantee.
 - Summer coursework **will not** be considered for summer/fall applicants.
 - Fall coursework **will not** be considered for spring applicants.
 - Applicants to the spring term should have the recommended or required coursework completed by the end of Summer II semester **before** applying.

Additional Information

- All required courses must be completed at the time of application.
- Applicants should complete an essay at the time of application indicating why they are choosing ENTO and how a degree in ENTO will help them fulfill their long-term educational and career goals.
- 2.5 GPA on all required or recommended coursework with no grade of D, F, or U accepted.
- The ENTO program **DOES NOT** participate in the PSA or PTA programs offered through TAMU.
- Contacting an academic advisor in this department is strongly recommended prior to application.
- For information regarding Transfer Course Equivalency, please refer to the following website: <https://compassxe-ssb.tamu.edu/HCA/ssb/transferCourseEquivalency/#/>

The recommendations below represent what a typical TAMU student's schedule looks like during the first four semesters. If working to complete an Associate's Degree before transferring, please align your degree plan to satisfy TAMU degree requirements. You may not have to complete the coursework in the sequence below but this major requires or recommends specific coursework to be completed.

Career & Educational Opportunities

Entomology is the basic and applied science of insects and their relatives such as ticks and mites. Insects are the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the many diverse roles played by the vast majority of insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and wellbeing of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.
